ABOUT ME

Full-Stack Developer who believes the best way to learn is by building. Skilled in creating scalable, responsive web applications with React.js, Next.js, Node.js, Express.js, MongoDB and MySQL, with a growing focus on Java backend development using Spring Boot. Backed by a strong foundation in Data Structures & Algorithms with 500+ LeetCode problems solved. Enjoys shipping clean, well-documented code, integrating AI into developer tools, and continuously picking up new technologies to build meaningful, real-world software.

EXPERIENCE & JOURNEY

Team Lead & Frontend Developer — DocFind Consultancy 2025

- Led a small team to design and ship a full-stack healthcare platform, owning the frontend architecture and coordinating backend integration.
- Collaborated in a team-based development environment, taking real-world project requirements from idea to a deployed product.

Competitive Programming & Hackathons 2024 – Present

- Secured 2nd place in two college hackathons, gaining hands-on experience in team-based, time-boxed development.
- Crossed 500+ solved problems on LeetCode across Arrays, Graphs, Trees, Maps, Sets and Dynamic Programming through consistent DSA practice.

Full-Stack & AI Tooling Development 2026

- Built OpenDocs, an AI-powered documentation generator, and a personal developer portfolio with live coding-activity dashboards.
- Currently strengthening backend engineering skills with Spring Boot and Java-based web backend systems.
